SUMMARY

Salesforce Developer with 6+ years designing, building, and deploying custom applications in enterprise and consulting environments, currently at Google. Specializes in Apex (triggers, Batch and Queueable), Lightning Web Components, and REST/SOAP integrations, writing bulkified, governor-limit-safe code and maintainable security models. Has led delivery of four Salesforce implementations and works directly with stakeholders from requirements through release. 10x Salesforce Certified, including Platform Developer II.

SKILLS

Development	Apex (triggers, classes, Batch, Queueable) · Lightning Web Components · Visualforce · Dynamic SOQL/SOSL · Flow Builder
Integrations	REST & SOAP web services · Webhooks · JSON/XML parsing · Middleware integration · Named Credentials
Architecture & security	Object modeling · Sharing rules · Permission sets & Permission Set Groups · Role hierarchy · Data security
Delivery & tooling	Git · Salesforce CLI · VS Code · CI/CD pipelines · Change sets · Unit testing & coverage · Code reviews · Agile/Scrum

EXPERIENCE

Salesforce Developer, Google · Arizona — Sep 2025 – Present

- Architecting the migration of legacy permission structures to a Permission Set Group model, reducing technical debt and simplifying user provisioning and lifecycle management.
- Deliver automated workflows and custom logic that streamline internal business processes and improve team efficiency.

Salesforce Developer, AAA – The Auto Club Group · Dearborn, MI — Mar 2023 – Sep 2025

- Built Apex REST callouts and JSON parsing to retrieve data from external systems and populate Salesforce records asynchronously within governor limits.
- Turned requirements from multiple business teams into scalable solutions using Apex, Lightning Web Components, and Flow.
- Designed features that reduced manual data entry and improved workflow efficiency and user experience.
- Partnered with stakeholders to prioritize the enhancement backlog and deliver the highest-impact work first.

Salesforce Developer, Slalom · New York, NY Sep 2022 – Mar 2023

- Led delivery of four Salesforce implementations, aligning technical solutions with each client's business goals.
- Defined product requirements and solution strategy directly with client stakeholders.
- Prioritized features and coordinated cross-functional teams to deliver on schedule, maintaining quality through testing and iterative feedback.

Salesforce Developer, Cognizant · New Jersey Feb 2020 – Sep 2022

- Delivered features supporting a large-scale CRM integration for Petco.
- Defined and refined requirements with stakeholders, acting as the bridge between business and engineering teams.
- Facilitated Agile ceremonies and improved the team's delivery efficiency.

Project Manager, Thales · Paris, France Jan 2018 – Feb 2019

- Managed product delivery for supply-chain and training applications, setting roadmap priorities and aligning stakeholders.
- Translated business needs into actionable development plans.

PROJECTS

Salesforce ↔ GitHub Integration · In progress

- Service Cloud Case escalation that creates GitHub Issues through Queueable Apex callouts, authenticated with a Named Credential and OAuth.
- Durable operation tracking with a unique idempotency key, a processing lease, and failure classification that separates retryable errors from outcomes needing reconciliation.
- Duplicate prevention with row locking and user-mode security, an integration log object, and repository settings in Custom Metadata.
- 39 Apex test methods with mocked callouts covering success, retries, timeouts, validation, and error paths.

CERTIFICATIONS

10x Salesforce Certified, including Platform Developer II, Platform Developer I, Administrator, Platform App Builder.

EDUCATION & TRAINING

Master's in Information Systems & Technology · IONIS-STM, Paris, France

Master's in International Business · IAE Poitiers, France

Software Engineering Immersive · General Assembly, San Francisco, CA

Salesforce Developer Apprenticeship · Quintrix, Jersey City, NJ
